PROFESSIONAL SUMMARY

Engineer who builds the platform and runs the customer call. Two years as the sole technical contact on enterprise accounts, owning discovery, demos, production delivery, and escalations. My edge is shipping in the agentic-AI stack: a published MCP server with 6,000+ downloads, an internal deployment platform with embedded agent tooling, and autonomous trading systems running in production.

EXPERIENCE

MOZEUS – *Software Engineer* *Atlanta, GA | 09/25 – Present*

- Sole technical owner of 6+ enterprise accounts, running discovery, solutioning, demos, production delivery end-to-end
- Cut new-client onboarding from 2 weeks to 1 day by building Forge from zero, an internal Azure platform (.NET, Bicep, embedded 10-tool MCP server) that deploys the full client stack as parameterized modules, fed by ETL pipelines handling 1M+ records/client.
- Faster delivery shortened sales cycles and drove re-signs and program expansion across accounts, supporting ~20% annual growth.
- Productized recurring client needs into reusable Forge modules (third-party AI-processing integrations and client-agnostic APIs)
- Cut Azure cost 50% ($20K → $10K/mo) by re-architecting client compute with scale-to-zero autoscaling (KEDA).

BLUE YONDER – *Software Engineer* *Atlanta, GA | 03/24 – 09/25*

- Unified 2,700+ microservice endpoints into one API surface (.NET + React) used by 100+ daily enterprise users; became the primary escalation point for client integration teams through their production migrations.
- Cut ML model deployment time 60% across 8 environments with a CI/CD publishing pipeline (GitHub Actions, automated rollback, versioning, audit trail); passed compliance review first-pass and was adopted company-wide.
- Built NUnit test infrastructure from scratch and Python scheduling automations, moving bug detection from QA to commit time.

MANHATTAN ASSOCIATES – *Research Engineer Intern* *Atlanta, GA | 05/23 – 08/23*

- Shipped RESTful microservices handling inventory across 200+ fulfillment nodes, improving inventory prediction accuracy 25%.
- Built a Python monitoring dashboard that cut test cycles 20% and surfaced real-time insights for non-technical stakeholders.

LIGHTER THAN AIR RESEARCH – *Technical Project Engineer Intern* *Sunnyvale, CA | 06/22 – 09/22*

- Coordinated avionics certifications and stakeholder schedules for Pathfinder 1, a hydrogen airship at NASA Ames Research Center.

PROFESSIONAL PROJECTS

Financial-MCP-Server – LLM Agent Tooling | *Python, FastMCP, PyPI*

- Published an MCP server to PyPI (6,000+ downloads, ~2,800/mo) giving LLM agents keyless access to 42 tools across SEC EDGAR, CFTC, FRED, Treasury, and market data; auto-publishes via Trusted Publishing gated on pytest.

PolyBot – Autonomous Agentic Trading System | *Python · NumPy · SQLite · Polymarket CLOB*

- Autonomous trader on Polymarket's 5-min BTC markets: Kelly-sized, fee-aware entries with adverse-selection monitoring and tiered circuit breakers, plus a nightly learning loop that tunes the exit engine; 10,000+ live trades and profitable.

MarketPulse – Financial Analytics & ML Platform | *Python, Pandas, Scikit-learn, Streamlit*

- 16-function weak-supervision labeling pipeline over live RSS feeds (TF-IDF + LogReg), paired with a paper-trading bot that consumes my custom MCP Server, closing the signal-to-execution loop.

TetrisBot – Reinforcement Learning Agent | *Python, TensorFlow, Pygame*

- Deep Q-learning agent, achieving 250 average lines cleared with automated parameter tuning and a real-time GUI for agent eval.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY *Online & Part-Time | Starting Fall 2026*

M.S. Computer Science (Artificial Intelligence / Machine Learning)

BOSTON UNIVERSITY *Boston, MA | 08/20 – 05/24*

B.A. Computer Science | Minor: Business Administration and Management | Varsity Squash Captain

SKILLS

Agentic AI: MCP (Client + Authoring) · Agentic Pipelines · Eval-Driven Development | **Languages & Web:** Python · C#/.NET · TypeScript · SQL · React · REST · Microservices | **Data & Systems:** Azure SQL · Redis / Caching · ETL Pipelines · Kafka · Multi-Tenant Architecture · Distributed System Design | **Cloud & Infra:** Azure (Container Apps · Bicep · KEDA) · AWS · Docker · CI/CD · Kubernetes | **Client-Facing:** Technical Discovery · Solutioning · Live Demos · Enterprise Onboarding · Production Escalation | **Certifications:** Microsoft Azure Fundamentals (AZ-900)
